## PROFILE

B.Tech CSE (AI & ML) student with practical experience building web applications and AI-based software. I enjoy working across frontend and backend development, turning ideas into working products, and learning new technologies by building projects. Currently looking for opportunities in software development, full-stack development, and AI/ML.

## EDUCATION

**Adamas University**, Kolkata, India

B.Tech in Computer Science & Engineering (AI & ML) | 2023–2027

CGPA: 6.70/10

## EXPERIENCE

**AI/ML Research Group Member — A.K. Choudhury School of Information Technology (AKCSIT), University of Calcutta**

2026–Present

- Joined the AI/ML Research Group and participate in research activities under the guidance of Prof. Amlan Chakrabarti.
- Working with the group on AI/ML research activities, including work related to AI for Healthcare.

## TECHNICAL SKILLS

**Programming:** Python, Java, JavaScript, TypeScript, C

**Web:** React, Next.js, HTML, CSS, Tailwind CSS

**Backend:** FastAPI, REST APIs, Node.js

**Database:** PostgreSQL, SQLite, Prisma

**Tools:** Git, GitHub, VS Code

## PROJECTS

**MusicFlow — Music Streaming Platform**

Next.js, React, TypeScript, Zustand, YouTube Music API

- Built a complete music streaming application with song search, playback, queues, playlists, likes, listening history, and a persistent global player.
- Implemented shuffle, repeat, previous/next, progress, volume controls, and persistent player state.
- Added PWA support and Media Session API features for a better mobile and background playback experience.

**Jarvis — Personal AI Operating System**

Python, FastAPI, SQLite, SQLAlchemy, LLM integrations

- Built a modular personal AI assistant with separate Brain, Planner, Memory, Intent Engine, and Tool Manager components.
- Worked on AI provider routing, task execution, persistent settings, memory, and streaming responses.
- Designed the backend as a foundation for a desktop assistant that can interact with applications and tools.

**AirOS — Computer Vision Control System**

Python, Computer Vision

- Built a computer-vision-based prototype for interacting with and controlling computer actions through visual input.
- Worked with real-time vision processing and visual interaction workflows.

## CERTIFICATIONS

- Oracle — Agentic AI Foundations Associate | Passed | Aug 2026
- FutureSkills Prime / IT-ITeS SSC NASSCOM — Gen AI Tools | Gold | 98% | Aug 2026
- Databricks — Accredited Generative AI Fundamentals | Dec 2024
- AWS Academy — Cloud Developing, Cloud Architecting | 2026
- AWS Academy — Generative AI Foundations, Machine Learning Foundations | 2025–2026
- AWS Academy — Machine Learning for Natural Language Processing | 2026
- AWS Academy — Cloud Data Pipeline Builder, Microservices & CI/CD Pipeline Builder | 2026

## ACHIEVEMENTS

- 3rd Prize — Rekhi Hippiathon, Adamas University | Jan 2026
- SIT ICOE Hackathon 2024 — Round 1; Team The Epsilon X secured Rank 89 | Apr 2024

## LANGUAGES

English, Bengali, Hindi
